SHAIK RESHMA

SAP Basis & HANA Consultant | SAP S/4HANA Migration Specialist | SAP Production Support

Hyderabad, India | 8978264889 | reshmashaik2111@gmail.com

PROFESSIONAL SUMMARY

Results-driven SAP Basis & HANA Consultant with 2+ years of experience administering and supporting SAP Basis, SAP HANA, and SAP S/4HANA landscapes across Development, QA, and Production environments. Proven expertise in system monitoring, transport management (TMS/STMS), background job and workflow administration, spool processing, database administration, system refresh, and backup & recovery, consistently improving system stability, transport efficiency, and incident resolution times. Skilled in leading SAP migration and transformation initiatives, including technical readiness validation, HANA database health checks, and post-migration support, combined with strong testing and defect-management experience using OpenText ALM. Known for structured technical documentation, ITIL-based incident management, and effective cross-functional collaboration that delivers reliable, audit-ready SAP operations.

CORE SKILLS

SAP Technologies: SAP Basis, SAP HANA, **SAP S/4HANA**, SAP Fiori, SAP NetWeaver, SAP Solution Manager, SAP Implementation, SAP Kernel & Support Package Upgrades, SAP Integration, HANA Migration

Migration & Testing Tools: OpenText ALM, OpenText VIM (Vendor Invoice Management), TMS (Transport Management System), JIRA, Lucidchart, ServiceNow ITSM

Operations & Administration: ITIL, RFC, Backup & Recovery, Disaster Recovery, Client Administration, Landscape Management, Patch & Note Management, System Copy, System Refresh, Background Job Scheduling & Monitoring, Spool Administration, Workflow Management, BCC, OCR

MS Office 365 & Productivity Tools: SharePoint, Excel, Power BI, Power Automate, Teams, Word, PowerPoint

PROFESSIONAL EXPERIENCE

SAP Basis Consultant – Mad Labs

Aug 2026 – Present

Client: SAP, Amgen

- Support SAP Basis, HANA database, and system integration activities for SAP migration and transformation projects — performing technical readiness checks, environment coordination, and post-migration verification using DB02, RZ20, and SM50 — improving migration readiness and validation efficiency by ~20–25%.
- Support SAP S/4HANA and HANA environments through system monitoring, database health checks via SAP HANA Studio and HANA Cockpit, performance and resource-utilization validation, and backup/recovery verification during migration cycles, sustaining system availability throughout transformation phases.
- Coordinate SAP Transport Management (TMS/STMS) and RFC/connectivity validation across landscapes, supporting controlled technical changes and defect investigation during integration and migration cycles.
- Manage testing and the full defect lifecycle in OpenText ALM — requirements, test plan/lab/execution, evidence, and defect tracking through resolution and closure — improving test execution and traceability by ~25–30% and reducing defect turnaround time by ~15–20%.
- Maintain migration documentation, technical validation records, test evidence, SOPs, and OpenText ECM project artifacts, improving project documentation efficiency by ~20%.

- Manage background job scheduling, workflow monitoring, and spool administration across SAP landscapes, coordinating with functional teams to support Vendor Invoice Management (OpenText VIM) workflows and ensure smooth invoice-processing cycles.

SAP Consultant – Movate Technologies *Jul 2024 – Jul 2026*

Client: Google, Unilever

- Delivered L2/L3 SAP Basis production support across SAP ECC, S/4HANA, BW, and HANA landscapes spanning Development, QA, and Production, using SM37, SM36, SM50, SM51, SM66, SM21, ST22, ST03N, ST06, DB02, RZ20, and AL08 for monitoring, job/work-process management, and performance troubleshooting — improving system stability by ~20–25%.
- Managed SAP Transport Management System (TMS/STMS) activities including transport request administration, import monitoring, and coordinated change movement across landscapes, reducing transport-related errors by 25–30% and improving transport/operational efficiency by ~20%.
- Administered SAP HANA databases via HANA Studio and HANA Cockpit, along with user and authorization administration using SU01, PFCG, SCC4, SCCL, and SCC9 — health checks, backup/recovery monitoring, memory and resource analysis, and system refresh/client-copy validation — improving HANA operational reliability by ~15–20%.
- Performed Root Cause Analysis (RCA) on incidents involving background jobs, work processes, RFC connectivity, database performance, spool processing (SP01), system locks (SM12/SM13), and system dumps, reducing recurring production incidents by ~15–20% and improving resolution time by 30%.
- Supported kernel upgrades and patch management using SPAM/SAINT; created SOPs, technical documentation, and RCA reports supporting ITIL-based incident management and audit readiness, sustaining SLA compliance above 95%.

AWS Cloud Virtual Internship *Dec 2022 – Feb 2023*

EDUCATION

Bachelor of Technology, Computer Science and Engineering *2020 – 2024*
Pace Institute of Technology & Sciences | CGPA: 8.94

Higher Secondary Education (MPC) *2018 – 2020*
Narayana Junior College | CGPA: 9.9

Secondary School Certificate (SSC) *2017 – 2018*
St Johns High School | CGPA: 10

LANGUAGES KNOWN

English, Telugu, Hindi
